MESSAGE PRIORITY DEFINITIONS

- **Action Required** messages require the user to complete an action on an ETID or WPS (i.e., ETID has been submitted for review). These messages will automatically be deleted when the required action is completed.
- **Warning** messages identify an event that has occurred that the user should know about, but no direct action is required. After the message is read, the user can delete the message.
- **INFO** messages identify a normal event in the processing of the document has occurred (i.e., Rejected ETID has been deleted). These can also be deleted by the user after reading.

SAMPLE

ETID and Intransit Control System (ICS)

- The ICS is a DoD tracking system for property designated for disposal by DRMS.
- ETID was designed to improve compliance with the ICS requirements.
 - * Property that meets ICS criteria is automatically entered for the generator
- Approved ETIDs that are never turned in can cause ICS mismatches
- Batching property subject to ICS tracking will cause mismatches

Follow Up On Approved ETIDs That Are Never Received

Process Receipt Refusal For Property Subject To ICS Tracking That Will Not Be Turned In
